

Graybill

CONFERENCE

Spatial Statistics

Agricultural, Ecological, and
Environmental Applications

Ecology of Global Change
Aquatic Resources Modeling

2004

June 17 - 18

Colorado State University

Keynote speaker:
Professor Noel Cressie
The Ohio State University

The conference will bring together researchers active in applying spatial statistics to a range of problems in environmental and ecological modeling. Scientists and statisticians interested in learning about current work in these fields are invited to attend. Graduate students conducting research in these fields are particularly encouraged to present their work either as a contributed paper or as a poster.

On June 16, 2004, the day preceding the conference, Dr. Jay Ver Hoef (Alaska Department of Fish and Game/University of Alaska-Fairbanks) will conduct a one-day short-course on "SPATIAL STATISTICS/Methods and Applications".
