Registering for the WebAssign® Class Management Tool

1) Go to https://www.webassign.net/login.html and click the “I HAVE A CLASS KEY” button.
   i) Use the following key to enroll in the class: colostate 4704 7083
   ii) colostate is the Institution to use when logging in
   b) WebAssign will ask you to verify that you’re enrolling for the correct class.
   c) You will then be asked if you already have an account for WebAssign. If you don’t, you’ll then be asked to create one. If you already have an account, it will ask you to create one.

2) Once you’ve successfully logged in you will be at a screen where you can purchase an access code or continue with the free trial period. My suggestion is to use the trial period until you’re absolutely certain (or it ends) that you will remain in the class.
   a) Click on the option that says, “purchase access online” if you wish to buy access directly through WebAssign.
   b) If you bought a code through the bookstore, click on the option that says “enter an access code.” You will be asked to enter a prefix in a drop-down box. Once this is selected, you will be allowed to enter the remainder of the code.

3) In the “Select Items” page you should see a check box for your course section. Make sure this is selected before continuing on.
   a) If you are purchasing directly through WebAssign, you will be redirected to PayPal to enter payment information. You can pay with a PayPal account, or with a credit or debit card (Visa, MasterCard, Discover, or American Express).

4) Follow any remaining instructions and you should have access.

FAQ

- WebAssign can’t find my record when I log in.
  - Make sure you enrolled in the class using the class key above. If you’re absolutely certain you did this, email me.

- I forgot my username and/or password.
  - I have access to your username and the ability to change your password. Email me and I’ll give you your username and/or a temporary password.

- I don’t have a credit card.
  - The CSU Bookstore sells access codes for WebAssign for $35. You can purchase a card there and pay in cash or have it charged to your student account.

- Why do we have to use WebAssign?
  - Although RamCT has some rudimentary assessment tools it is very inefficient and lacks the sophistication necessary to construct meaningful homework exercises. WebAssign has a multitude of built in statistical functions. I can also write algorithmic problems which generate different values for each student on each assignment. This feature allows me to give you multiple opportunities to complete an exercise with an expectation that you’ll actually learn something rather than just memorize an answer.
