

boot package

Created By Cristian Oliva Aviles on Wednesday, November 12, 2014 1:01:40 AM MST

There are at least two packages available in R for performing bootstrap: the boot package and the bootstrap package. Here I will focus only on the boot package.

The manual for this package could be find here: <http://cran.r-project.org/web/packages/boot/boot.pdf>

The following R script contains some of the main functions of this package: [bootR.R](#)
